Press Release

Intersoft Systems Partners with Applianz Technologies

Intersoft announces an easy deployment option for INTERAC applications with its new virtualized server solution from Applianz Technologies.

Beaverton, OR, July 20, 2010: During the last 12 months we have been fielding requests for an INTERAC SaaS (Software as a Service) solution. Virtualized servers and workstations utilizing current virtualization technology along with increased Internet bandwidth are making hosted accounting applications a popular, cost-effective option for many businesses. While SaaS may not be appropriate for every business today, its popularity and utilization will continue to grow in the same way that the internet has.

After months of researching and evaluating a variety of options, Intersoft is pleased to announce a new partnership with Applianz Technologies, Inc., located in Wichita Kansas. The patented Applianz SaaS solution is unique, offering flexibility and services that no other hosting provider can provide; a powerful, cost-effective, virtualized, complete system, all in one box.

About Intersoft

Intersoft Systems is the developer and provider of INTERAC software, a fully integrated suite of financial and management applications to streamline control and access to mission critical information at every stage of the business cycle. Our modular structure allows for a flexible configuration to match your specific requirements - growing with you as your needs change - while maintaining a fully integrated interface to all applications.
