## Press Release

### Job Tracker v 3.0 Released

#### Intersoft announces the release of the newly enhanced Job Tracker field data capture and reporting tool for contractors.

Beaverton, OR, March 8, 2011: Job Tracker is an even more efficient and easy-to-use product designed to gather data in the field for both field reporting and for input to the INTERAC accounting system. The latest enhancements further automate much of the back end processing, saving even more time. Job Tracker's two primary purposes are first is to collect and report employee time, equipment usage, and materials usage in the field and second, to provide a wealth of reporting information which can be used as a management tool to monitor job progress and labor costs. Supported on a Windows PCs, Job Tracker provides a simple data entry screen for project managers, timekeepers, or remote office personnel. Job Tracker eliminates the need to fax handwritten time cards, call in daily time, or pay overnight charges to get payroll and equipment data back to the accounting department or in from client locations. Employee time, equipment and material usage information can all be collected real-time.

Call us to schedule a web-based product demonstration.

#### About Intersoft

Since 1982, Intersoft Systems has been the developer and provider of INTERAC software, a fully integrated suite of financial and management applications to streamline control and access to mission critical information at every stage of the business cycle. Our modular structure allows for a flexible configuration to match your specific requirements - growing with you as your needs change - while maintaining a fully integrated interface to all applications.

For Release – March 8, 2011
