## Press Release

### 2010 INTERAC User Meeting

Intersoft announces its 2010 annual user meeting, an excellent opportunity to network with other INTERAC users as well as learn about the latest INTERAC enhancements and new products.

Beaverton, OR, May 28, 2010: A key requirement of any accounting system is the ability to easily design reports; this has always been a strength of the INTERAC Design Custom Report writer (DCR). A new and updated Sample Report Package will be distributed to everyone in attendance. You will be able to use these reports as they are or easily modify them to fit your specific requirements. *This Sample Report Package alone will justify your attendance.* During the past several years Intersoft has developed DMS, Time Tracker, and Job Tracker which adds tremendous functionality to other INTERAC applications. DMS adds capabilities to every INTERAC application, while Time Tracker streamlines capturing employee time for payroll processing with real-time labor reporting. Job Tracker offers the same payroll benefits plus Job Cost, Equipment Cost, and Material Tracking with real-time reporting for project management. Case studies will be presented describing how companies are successfully using these products.

#### About Intersoft

Intersoft Systems is the developer and provider of INTERAC software, a fully integrated suite of financial and management applications to streamline control and access to mission critical information at every stage of the business cycle. Our modular structure allows for a flexible configuration to match your specific requirements - growing with you as your needs change - while maintaining a fully integrated interface to all applications.

For Release – April 30, 2009
